

CODE OF CONDUCT

EOS42 published the first Block Producer code of conduct in April 2019. Over the course of observing the mainnet we've made changes that reflect our ever evolving understanding of how to be the most generative Block Producer for the EOS mainnet.

We therefore present for the Mainnet Launch our v2.0 Code of Conduct for the community.

OUR PRINCIPLES

01 Honesty, Integrity and Ethics

EOS42 will always act with honesty, integrity and apply the highest ethical standards in all aspects of our conduct. This includes abiding by all aspects of the EOS Constitution and Block Producer Agreement. We will continuously advocate for standards and policy in favor of accountability, and go above & beyond to model the qualities that we believe will promote a flourishing EOS mainnet.

02 Political & Financial Independence

EOS42 will maintain full operational and financial independence at all times. This includes no operational control by any outside investors, and no ownership stake held by any individual or entity that holds vested interest stakes in other EOS.IO block producers. Additionally, EOS42 will not collude with other block producers or run more than one node on the EOS mainnet.

03 High Network Performance

EOS42 places the highest priority on investing back into the required network infrastructure, and staffing most talented individuals in the industry to enable the EOS network to perform at the highest level and scale effectively.

04 Security

EOS42 will initiate 6 monthly independent security audits on our EOS blockchain infrastructure to ensure we operate at the highest level of security, and ensure we never compromise EOS blockchains.

05 Transparency

EOS42 will provide team and financial transparency that exceeds those required by company law and meets the requirements of the EOS constitution. The EOS42 team and any passive investor structure will also be transparent to the community, and we will always seek to exceed ongoing community requirements as these evolve.

OUR PRINCIPLES (CONTINUED)

06 Small, Trusted Team

EOS42 will endeavour to keep the core team small and trusted. This principle of structuring similarly to a Chama will mean that everyone knows everyone, and increase our resilience to threats from internal and external theft and corruption. Our team as members of EOS42 will additionally pay a personal stake into a block producer bond, to ensure there is personal liability for behaviour.

07 Community Value Add

EOS42 will align our behaviours with the interests of the Community in a variety of ways to add value. Examples will include funding worker proposals, building/supporting dApps that provide a direct value add to the wider ecosystem, and carefully using a portion of block rewards for an EOS42 incubator to fund start-ups and existing businesses moving onto EOS.

08 Charitable Support

EOS42 will commit a fixed percentage of net profit towards registered charities globally with particular emphasis on third world blockchain education and widening access to opportunities.

09 Abide By All Arbitration Decisions

EOS42 as a Block Producer will abide by and action all arbitration decisions and ensure these are enacted to provide support to the EOS.IO ecosystem.

10 Co-operation Never Collusion

EOS42 as a Block Producer will welcome all opportunities to co-operate with other Block Producers that do not compromise our independence. We believe that cooperation is healthy for the whole ecosystem and allows for the completion of tasks with bigger scale. Examples include co-sponsoring events, co-hosting hackathons, and jointly working on dApp projects that will be community owned.

10 Commitment to Token-holders

EOS42 commit to maintaining an ongoing dialogue with the community wherever conversations are being held, regardless of the size of the stake or the number of tokens held. We commit to listening, understanding, and achieving consensus with the token-holder community, to the best of our abilities in a multilingual fashion.
